

ERICA MILLAN

Software Engineer & IT Operations Specialist

SKILLS

Programming/Development: Designed and deployed full-stack applications using C#, ASP.NET MVC, SQL, Python, and JavaScript.

Systems & IT Operations: Active Directory, Group Policy, Windows Server, Networking, Virtualization(Hyper-V), Powershell, IT Desktop support, Azure AD, Jira Administration

Frameworks: MVC 5, Entity Framework, jQuery, Winforms, ASP.NET, ADO.NET, Bootstrap,

Operating Systems: Windows, Mac OS X

IDE & Tools: Visual Studio, VS code, PyCharm, Github, IntelliJ, IDLE

Databases: SQL Server Management Studio, SQLite
Version Control: Git & GitHub

EDUCATION

Masters of Science, Computer Information Systems

Florida Institute of Technology University
2020 - 2022

Full Stack Certification

The Tech Academy
2020 - 2023

📞 772-985-7184

EXPERIENCE

- **Software Developer Intern** 2026
Prosper IT
 - Built features for TheatreCMS3 using C#, ASP.NET MVC, JavaScript, CSS.
 - Engineered Python/Django modules with dynamic, database-backed UI components and interactive client-side features.
- **It Client System Administrator** 2023 - 2025
Ziosk
 - Supported and optimized Windows/macOS environments and hybrid infrastructure.
 - Managed Azure AD, onboarding, identity lifecycle, and resource provisioning.
 - Administered Windows Server, Hyper-V VMs, and on-prem/cloud resources.
 - Served as Jira Administrator, managing workflows, permissions, and project configurations.
 - Provided Tier 2/3 support and ensured high operational reliability.
 - Support corporate networks, printers, desktops, and laptops.
- **IT Specialist** 2022 - 2023
The Immediate Resource
 - Administered Windows Server, DNS, Active Directory, permissions, and disaster recovery.
 - Managed enterprise systems including Fortigate, Synology, SentinelOne, Barracuda, and backup infrastructure.
 - Built and maintained C# .NET integrations for Shopify and ADP.
 - Executed SQL queries and REST API integrations to support business operations.
 - Delivered workstation, VOIP, and network support across the organization.
- **Junior Software Engineer** 2021-2022
10rx Telemedicine
 - Developed backend features for a production telemedicine platform using C#, .NET, SQL.
 - Performed API testing with Swagger and contributed to technical design discussions.
 - Debugged backend issues and wrote complex MySQL queries to support platform functionality.
 - Participated in Agile/Scrum workflows to deliver iterative improvements.

RELEVANT PROJECT EXPERIENCE BY TECHNOLOGY

▪ ASP.NET MVC, C# SQL- TheatreCMS3

2026

Intern Prosper IT

- Enhanced a C#/ASP.NET MVC web application by developing features for a project called the TheatreCMS3 Rental History module, including client-side sorting dropdown and dynamically reordered rental entries without page reload, UI alignment fixes, and improved data presentation using Razor, JavaScript, and CSS.

▪ Python / Django — Zelda Character Management

2026

Intern Prosper IT

- Developed a Python/Django module for managing and displaying Zelda character data backed by a relational database using Django ORM. Implemented dynamic character grouping, multi-section featured slideshows, and interactive modal detail views. Added client-side functionality with JavaScript for slide navigation, auto-opening character cards, and horizontal scrolling lists.

▪ Powershell

2023-2025

Ziosk/The Immedate Resource

- Automated employee onboarding and user management tasks by creating PowerShell scripts integrated with Microsoft 365 and Active Directory, including email storage analysis, user data updates, and administrative reporting.

▪ C# SQL 10RX Telemedicine

2021 - 2022

10 RX Telemedicine

- Designed and implemented a complete email communication subsystem for a production telemedicine platform. Built backend services in C#, ASP.NET MVC, and Entity Framework to send automated emails for patient onboarding, appointment reminders, and password resets. Created responsive HTML/CSS email templates, integrated with AWS (SES/SMTP) for reliable delivery, and implemented SQL-based email logging with an admin UI for tracking message history.

▪ Data Analytics Dashboard with C#/.NET

2022

Florida Institute of Technology - Master's Capstone Project (2022)

- Designed and developed a full-stack data analytics application with interactive dashboards for revenue trends, order volume, and product performance.
- Implemented C#/.NET backend services and integrated a relational database for real-time data visualization.
- Built dynamic charts and UI components (line graphs, donut charts, date-range filtering) to analyze business KPIs.
- Created a clean, intuitive interface with navigation for inventory, suppliers, orders, and customer data.
